

## 18:11 Bring out your dead! Bugs, that is.

from the desk of Pastor Manul Laphroaig,  
Tract Association of PoC||GTFO.

Dearest neighbor,

Our scruffy little gang started this самиздат journal a few years back because we didn't much like the academic ones, but also because we wanted to learn new tricks for reverse engineering. We wanted to publish the methods that make exploits and polyglots possible, so that folks could learn from each other. Over the years, we've been blessed with the privilege of editing these tricks, of seeing them early, and of seeing them through to print.

Now it's your turn to share what you know, that nifty little truth that other folks might not yet know. It could be simple, or a bit advanced. Whatever your nifty tricks, if they are clever, we would like to publish them.

Do this: write an email in 7-bit ASCII telling our editors how to reproduce *ONE* clever, technical trick from your research. If you are uncertain of your English, we'll happily translate from French, Russian, Southern Appalachian, and German.

Like an email, keep it short. Like an email, you should assume that we already know more than a bit about hacking, and that we'll be insulted or—WORSE!—that we'll be bored if you include a long tutorial where a quick explanation would do.

Teach me how to falsify a freshman physics experiment by abusing floating-point edge cases. Show me how to enumerate the behavior of all illegal instructions in a particular implementation of 6502, or how to quickly blacklist any byte from amd64 shellcode. Explain to me how shellcode in Wine or ReactOS might be simpler than in real Windows.

Don't tell us that it's possible; rather, teach us how to do it ourselves with the absolute minimum of formality and bullshit.

Like an email, we expect informal language and hand-sketched diagrams. Write it in a single sitting, and leave any editing for your poor preacherman to do over a bottle of fine scotch. Send this to [pastor@phrack.org](mailto:pastor@phrack.org) and hope that the neighborly Phrack folks—praise be to them!—aren't man-in-the-middling our submission process.

Yours in PoC and Pwnage,  
Pastor Manul Laphroaig, T.G. S.B.

### Books You Must Have

**THE EXPERIMENTER'S LIBRARY NO. 1**  
**HOW TO MAKE WIRELESS SENDING APPARATUS**  
BY  
**20 RADIO EXPERTS**  
100 PAGES 88 ILLUSTRATIONS  
PRICE 25c  
PUBLISHED BY THE EXPERIMENTER PUBLISHING CO., INC. 233 FULTON ST., N. Y. CITY

#### TWO REMARKABLE BOOKS

##### How to Make Wireless Sending Apparatus

THIS book will surely be welcomed by every wireless enthusiast and by everyone who is fond of making his own apparatus.

This book contains more information on how-to-make up-to-date sending apparatus than any other book we know of. Thirty different pieces of apparatus can be made with materials that most anyone can obtain without much trouble; the illustrations and descriptions being so clear and simple that no trouble will be experienced in making the instruments. Only strictly modern and up-to-date apparatus are described in this book and if we asked you 50 cents for it we are sure that you would consider it a bargain.

This book has been written by twenty radio experts who know how to make wireless sending apparatus and for that reason you will gain by their experience as well as by their experiments.

The size of the book is 7x inches, substantially bound in paper; the cover being printed in two colors. Contains 100 pages and 88 illustrations. There are quite a few full page illustrations giving all dimensions, working diagrams as well as many photographs showing the finished apparatus.

**PRICE 25c. PREPAID**

**THE EXPERIMENTER'S LIBRARY NO. 2**  
**HOW TO MAKE WIRELESS RECEIVING APPARATUS**  
BY  
**20 RADIO CONSTRUCTORS**  
100 PAGES 90 ILLUSTRATIONS  
PRICE 25c  
PUBLISHED BY THE EXPERIMENTER PUBLISHING CO., INC. 233 FULTON ST., N. Y. CITY

##### How to Make Wireless Receiving Apparatus

WE know that this book will surely be a boon to every "How-to-make-it" fiend. It has been written and published entirely for the wireless enthusiast who makes his own receiving apparatus; the twenty radio constructors who have written the articles are well-seasoned in the art and know whereof they speak. You consequently profit by their experience.

Only strictly up-to-date and modern apparatus are described and only those that the average experimenter can make himself with material that can be readily obtained.

We believe that this book contains more information on how to make wireless receiving apparatus than any other book in print and you will find that it is easily worth double the price we are asking for it.

The size of the book is 7x5 inches, handsomely bound in paper; the cover being printed in two colors. Contains 100 pages and 90 illustrations. There are a number of full page illustrations giving all dimensions, as well as photographs showing finished apparatus.

**PRICE 25c. PREPAID** Send for these two books today.
